Contour 21

# Splash

The next generation washroom for the next generation

# Introduction.

Armitage Shanks has been manufacturing school washrooms for over 100 years, ensuring the very best standards are met for children, no matter the stage of their educational journey.

## Introducing the latest range of fun and interactive school washroom products

- Bright coloured seats and push plates to give interest and vibrancy
- Hybrid rimless technology for extra water hygiene and water saving
- Water saving wc's and taps
- Ergonomic design with smooth lines for safety and easy cleaning
- New 355mm wall hung pan
- Range covers ages 3 to 5 years, 5 to 7 years and 7 to 11 years
- Easy to use and safe taps, including push button, lever and sensor
- New trough for faster flow of children through washroom

## Contents

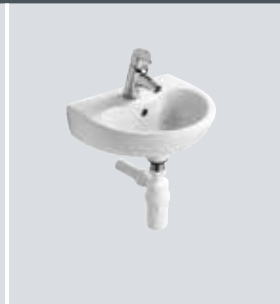

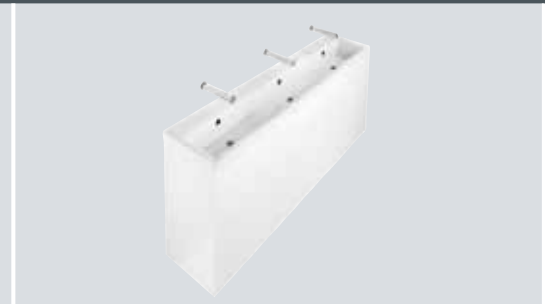

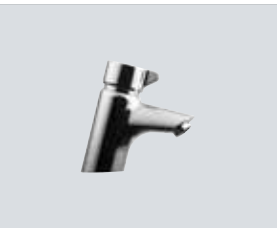

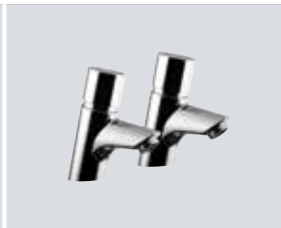

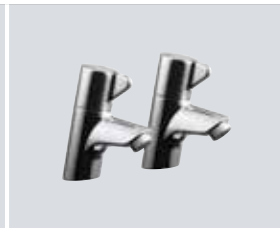

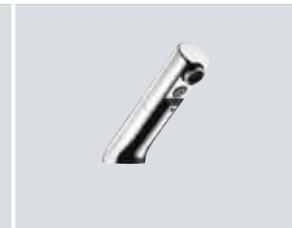

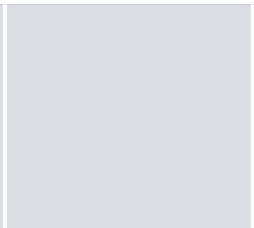

- 02 Product overview
- 04 Water Saving
- 06 Nursery (3-5 years of age)
- 10 Primary - Key stage 1 (5-7 years of age)
- 14 Junior - Key stage 2 (7-11 years of age)
- 18 Technical Specifications

“Being able to visit the washroom and feel safe and comfortable is crucial to a happy school life”

Mrs Taylor, teacher

# Why choose Splash?

- 1. Environment** ✓ Bright and engaging designs with vibrant WC seats and flush plates to encourage positive experiences within the school washroom.
- 2. Ergonomic** ✓ Every product has been designed for ease of use across a wide age range of children. Ergonomically designed WC seats with handles enable children to get on and off the toilet easily, whilst being comfortable to use. Basin design continues the aesthetic throughout the entire washroom.

- 3. Hygiene** ✓ The introduction of the 355mm wall hung pan gives yet another level of cleanliness to the washroom. The rimless pans ensure that this hygiene is carried through to the inside of the pan, as the lack of a rim ensures that Bacteria has nowhere to hide.

- 4. Safety** ✓ Innovative technologies ensure the safest environment for children. Including thermostatic taps and mixers which maintain a cool body to prevent scalding. Cover fastener, to prevent children from removing the cistern lid.

- 5. Water saving** ✓ Splash wc's are designed with the latest water saving technology, helping to protect the environment and save you money. The development of the Eco flush button and Eco flush lever, with their green water saving buttons, helps to educate children about good water usage behaviour.

Add to this a combination of Sensorflow taps, push button fittings and dual flush pushplates and you can ensure the most efficient use of water.

# Water Saving technology

Almost 33% of the water used in schools comes out of washroom taps. Simply fitting a tap with a flow limiter will reduce this figure by a substantial 58%.

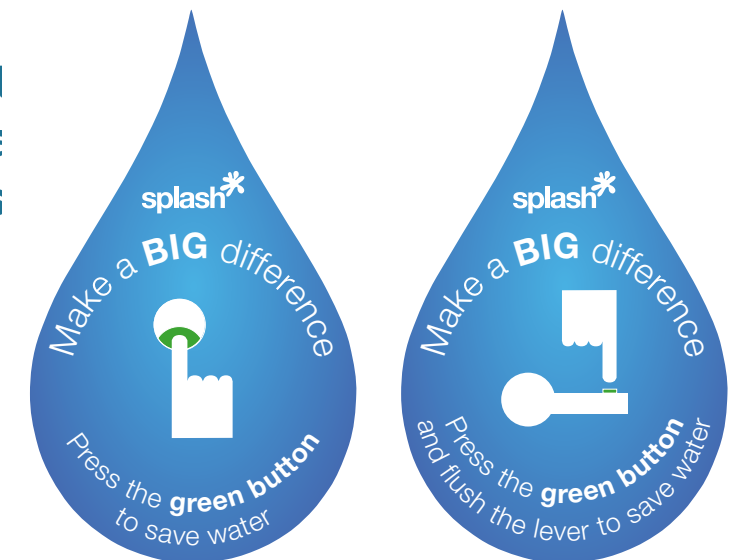

## Water saving technology

- The Splash range can help to reduce your water bills by over 30%
- Splash wc's flush on as little as 4/2.6 litres
- Rimless technology helps to reduce the amount of water used for each flush
- The new Eco button and Eco flush lever can reduce the amount of water flushed by 35%, with a simple push of a fun green button
- Each cistern contains a sticker to help the children understand how to use the green buttons and ultimately save water
- We also know that water usage is greatly affected by user behaviour. When you buy Contour 21 Splash we provide educational material to teach children how they can reduce water usage, helping them learn good habits for later in life.

**Dual flush cisterns can easily save water in school washrooms. Correct usage and maintenance are important to realise the water-saving benefits of this technology.**

**The Environment agency believes that most schools can easily reduce water consumption, and their water bills by 30%**

# Nursery. Providing washrooms to improve confidence

Splash has been carefully designed to ensure that children have an inviting comfortable environment, making for an easy transition from home to public washroom.

“I really enjoy going to the toilet here at school, I like the colours and the green button which uses less water.”

Stevie, aged 5.

Nursery. (3-5 years of age)

**Specially designed for younger children, the 305 wc pan, 40cm basin and easy action taps, make this washroom the perfect choice for any nursery.**

# Key Stage 1. Building for tomorrow, today

When starting Key Stage 1, children will visit the toilet alone, possibly for the first time. With its bright colours and fun design, Splash makes this change easier.

“My school has great toilets. I used to be scared to go and would wait until I got home, but now I like it better at school!”

Lucy, aged 8.

**Easy to use push button taps automatically turn off after a few seconds, avoiding unnecessary water wastage**

**“We’ve been learning about how water saving and helping the environment is really important at school. So I like how we can help with the new toilets and taps.”**

Jonathan, aged 9

# Key Stage 2. Simplistic facilities with an air of maturity

As children enter Key Stage 2 Splash offers larger basins and wc's. The range is flexible enough to offer more grown up facilities whilst keeping design continuity throughout the school washrooms

Junior. (7-11 years of age)

17

**This Key Stage 2 washroom features the new wall hung pan designed for easy cleaning inside, outside and around the bowl. Adding a semi ped to the 50cm basin not only conceals the pipe work but adds a level of sophistication for the older child.**

**“The new school washrooms have made my life easier as they take less time to clean.”**

Chrissie school cleaner

## Guarantee

### Lifetime

All ceramic products

### 5 years

on taps and mixers, toilet seats and cistern fittings

Our confidence in the quality and reliability of our product allows us to offer outstanding extended guarantees on all our products – where the product fails within 5/25 years/lifetime we offer a free replacement or replacement part (or nearest equivalent). So when your washroom and bathroom has been satisfactorily installed and is working well, please ensure you register your guarantee.

Liability is limited to individual products and the guarantee does not cover the consequential loss or damage or installation costs. This guarantee does not affect your statutory rights. Products must be installed, used and cared for in line with our fixing instructions and local water regulations, and room must be adequately ventilated.

Parts (eg. flushvalves) are guaranteed for five years and will be replaced if found to be faulty. The guarantee does not cover general wear and tear. Applies to UK and Republic of Ireland only.

Colours printed in this book are as near as possible to the manufactured range of Armitage Shanks quality bathrooms. For accurate comparisons of colours, see actual ware on display at Armitage Shanks retailers. Our policy is one of continuous improvement and we reserve the right to change specification and design at any time without notice.

All measurements are in millimetres and are approximate. Products can be subject to tolerances due to manufacturing processes.
